Hi Laura, fyi - while this wasn't called out in the ROD as we did remove most of the surface tar on the beach in 2005—I think these signs are still a good idea as any remnant shallow pure tar can cause skin burns.

Thanks!

S

Subject: NW Natural, Gasco Beach Signage

Good afternoon Bob.

Attached is DEQ's letter requesting that by December 15, 2017 NW Natural post signs along the Gasco Site shoreline to warn the public about the presence of polycyclic aromatic hydrocarbons (PAHs). DEQ's request follows up on recommendations made by the Oregon Health Authority (OHA).

DEQ appreciates and acknowledges NW Natural's ongoing work at the Gasco Site, including posting the signage.

Please feel free to contact me if you have questions regarding this e-mail or the attachments.

Dana
